10. Open the file installation path。

X64 selection C:\Program Files\Inkscape\share\inkscape\extensions\

X86 selection C:\Program Files (x86)\Inkscape\share\inkscape\extensions\

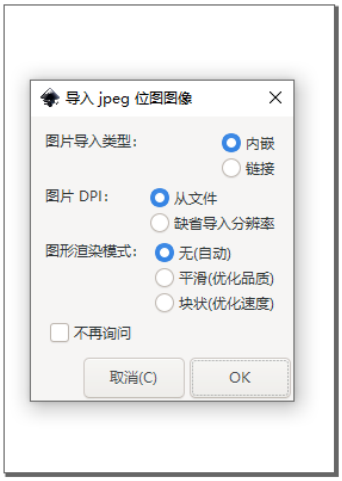

11. Copy the files in the [Youzhihui NC] folder to the above [extensions] folder.

12 Software installation is over.

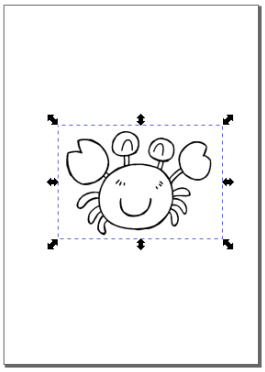

二、 How to use the software

1、 Run【Inkscape】software

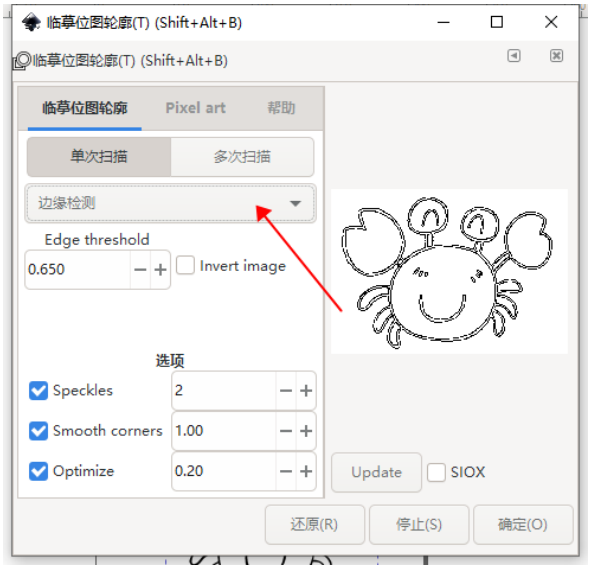

2、 Drag the picture to be processed into the work area, and select [OK] in the pop-up prompt box

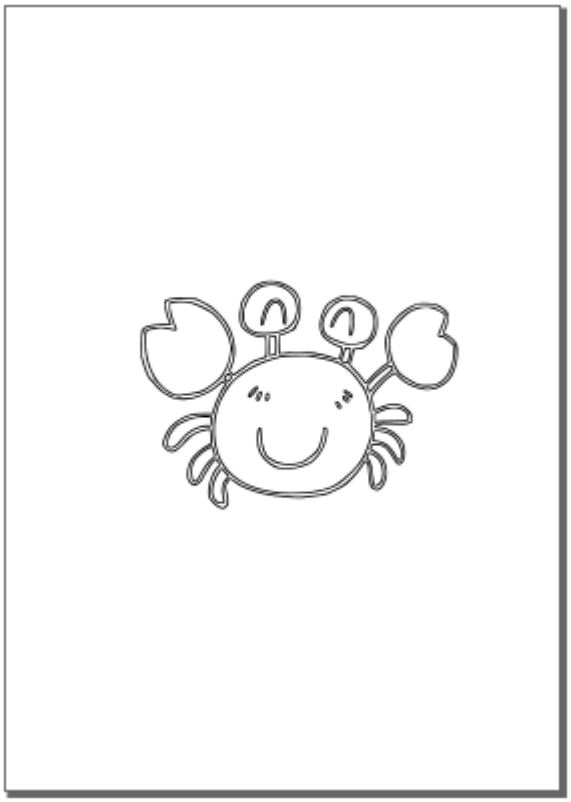

3、 Drag the arrow around the picture to adjust the appropriate size

4、 Select the menu [路径]-[临摹位图轮廓] to open the dialog box

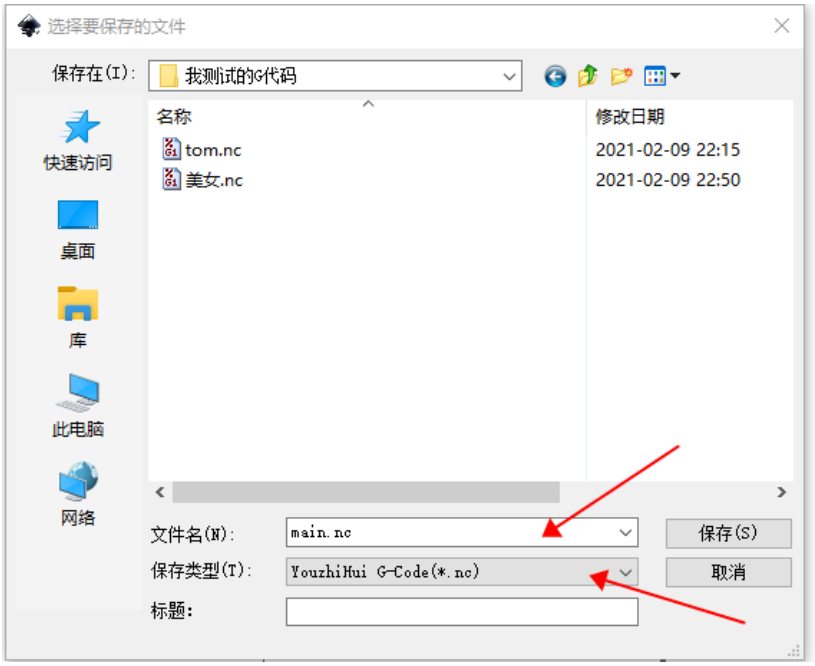

5、 Select [边缘检测] or [Centerline tracing(autotrace)], click the [确定 (O)] button, and click X to close the dialog

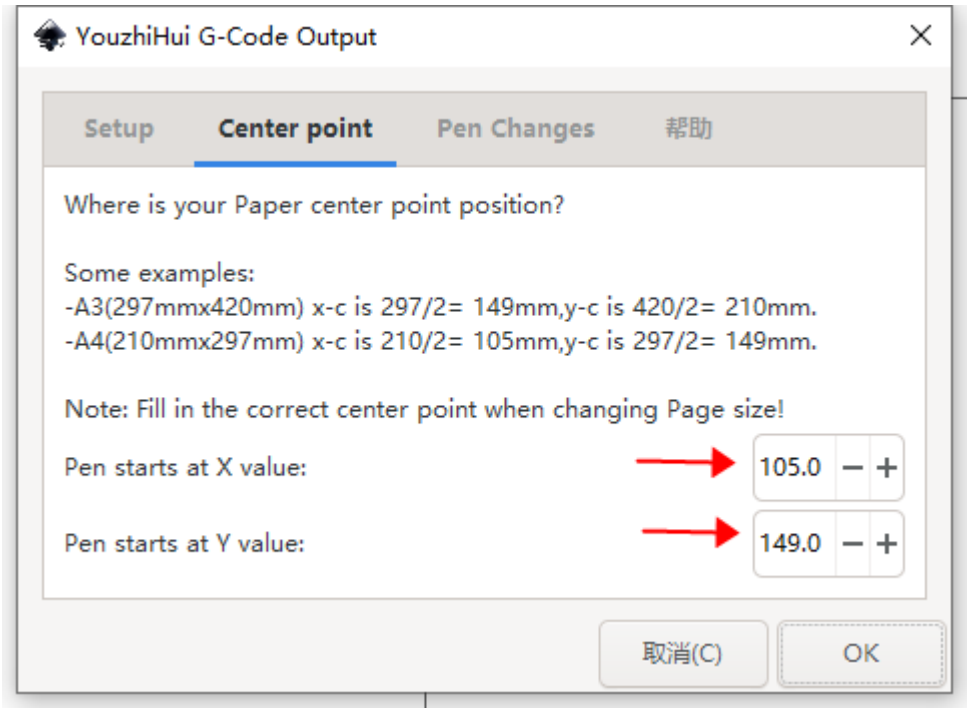

6、 After dragging out the original image, press the [Delete] button to delete the original image, leaving only the path after edge detection。

7、 Select the menu【文件】-【另存为...】

8、First select the folder to save to, then select the save type as [YouzhiHui G-Code(*.nc)], and rename the file name to [main.nc]. Click the [Save (S)] button

9、Set the center point according to the actual situation, the above figure shows the center point parameters of A4 paper.

The center point parameter of A3 paper is

X value 149

Y value 210

10、 Click the [OK] button to save, you can view the generated main.nc file in the [CIMCOEdit] program, or copy it directly to the TF card for drawing.
