A brief description of the G code viewing tool

一、install software

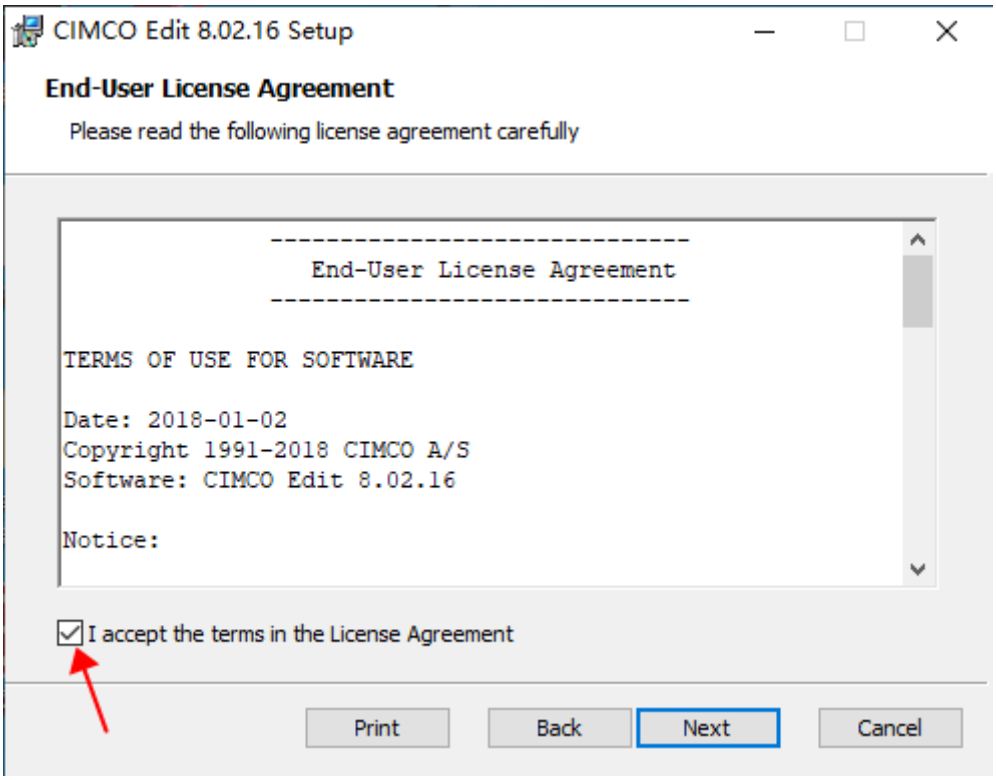

1、 Run CIMCOEdit.exe

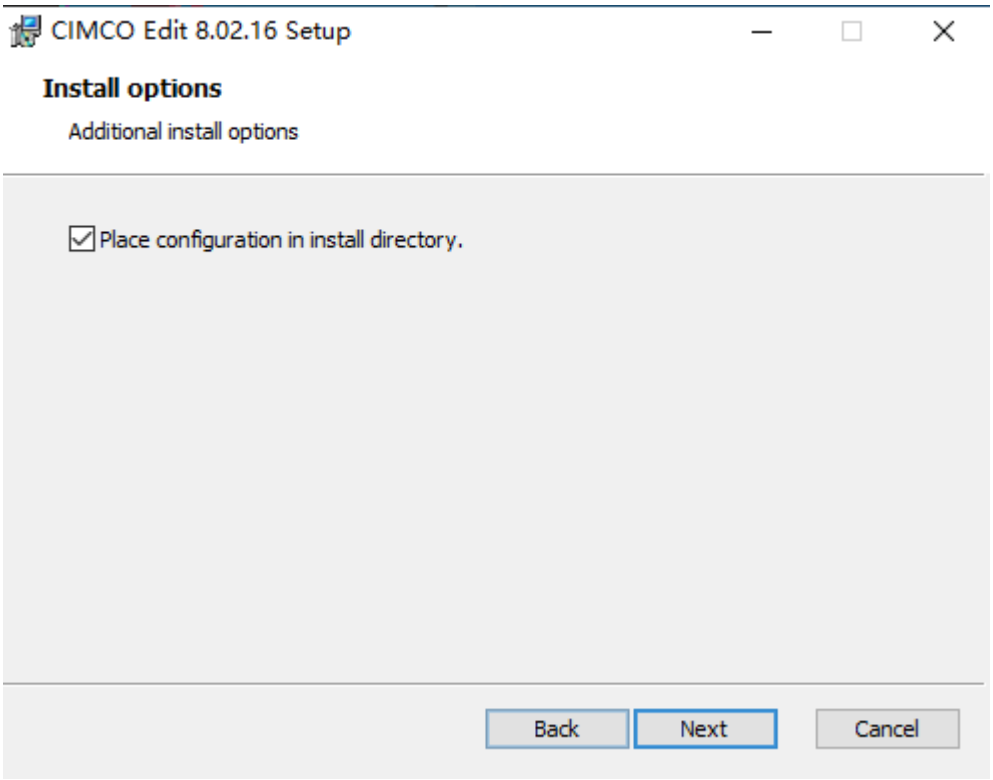

2、 Select [English] and click [OK] to continue

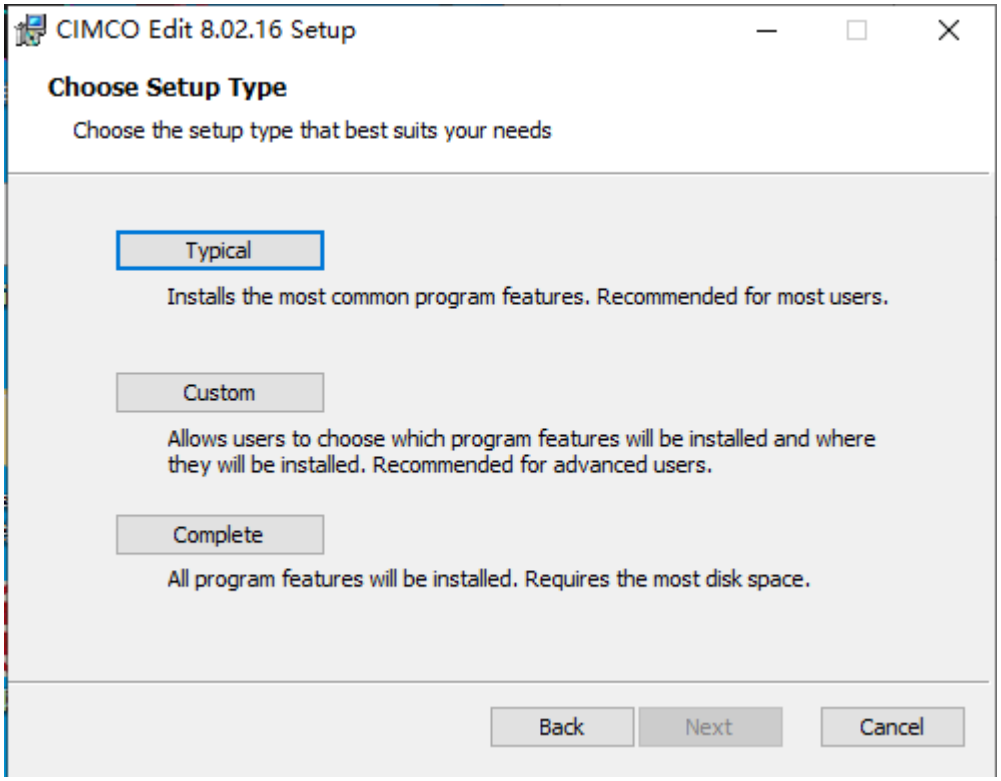

3、 Click [NEXT] button to continue

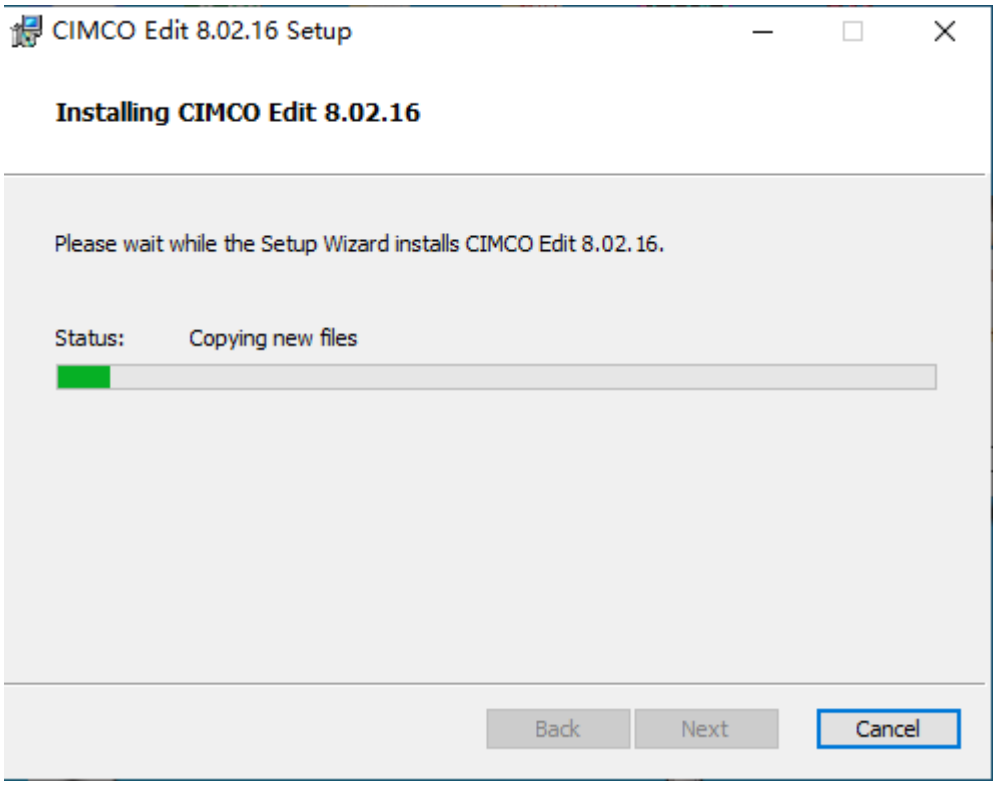

4、 Check I accept... and click [NEXT] to continue

5、 Click [NEXT] button to continue

6、 After selecting [Typical], click the [Install] button

7、 start installation

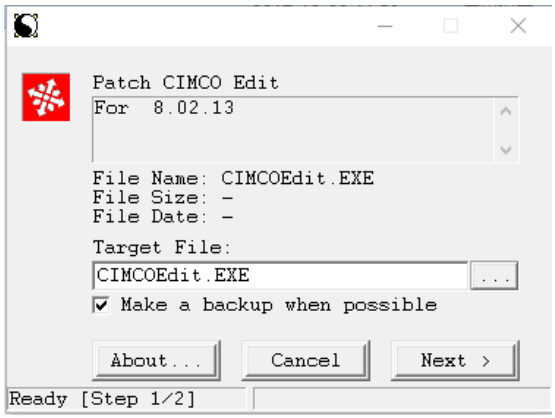

8、 Click the [Finish] button to end the installation

9、 Open the [Patch] folder and copy [8.02.xx.exe]

10、 Back to the desktop, right-click on the icon with the mouse-select [Open File Location], and paste the [8.02.xx.exe] program just copied into the opened folder.

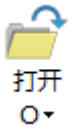

11、Run【8.02.xx.exe】software.

12、Click [Next >] button to complete the program cracking.

二、use the software

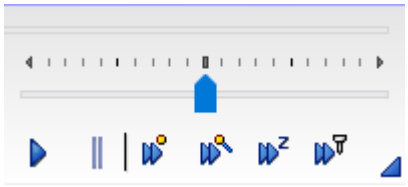

1、 Double-click to run CIMCO Edit8 software

2、 Click the [打开] button in the interface to open the G code to be previewed. Or directly drag the G code file into。

3、 After opening the file, select the【仿真】tab, and click【窗口文件仿真】button

4、 In the lower right corner of the software interface are related control buttons for path preview. After the preview is ok, you can copy it to the TF card to run the drawing.

5、 Please explore other functions by yourself.
